UPDATED: 'THU MAR 1 07:26:57 2018, COMMIT 968F4AE'

Images are uniquely identified by way of a URI that matches the following signature:

<Glance Server Location>/v1/images/<ID>

where <Glance Server Location> is the resource location of the Glance service that knows about an image, and <ID> is the image's identifier. Image identifiers in Glance are *uuids*, making them *globally unique*.
